

## MTRX K1 - Confidently Take Control of Your Health

Customer and employee trust is irreplaceable. Protecting the health of your organization, employees, and customers is critical. The MTRX K1 monitors the health of your customers and employees so that they feel safe and confident. The K1 simply accomplishes this by providing revolutionary health scanning technology that integrates seamlessly within any organization.

Temperature

Heart Rate

Respiration

## The New Standard in Health Evaluation

Simple to Use

Free standing, solid steel construction. Just plug-in the K1 to launch the touch free health scanning.

Integrations

Available to use with identification card or QR Code for employees, patients, or ticketed guests.

## MTRX L1 - Sanitization & Trace

The MTRX system has user location tracking to specifically target and expedite sanitation if infected users enter the facility. Location tracking can also identify who came in close contact with the infected user. With built in RFID, bluetooth, and flexible networking options, the K1 is the ultimate risk management and health data management system.

## MTRX KLD - Your Intuitive Data Solution

The MTRX KLD analyzes all of the information gathered by MTRX's connected devices and intuitively communicates system status and alerts. This enables your organization to have effortless real time situational awareness so your organization can maintain enterprise continuity and operate confidently.
